

Bio for William (Will) H. Nuckols III

Mr. William Nuckols is a scientist by background and a policy expert and communicator by practice.

His 20+ years of work in the field of environmental science and policy is well respected, and he has received awards and letters recognizing his contributions by President Obama, the Assistant Secretary of the Army for Civil Works, members of Congress and members of industry.

He is an expert at combining the capabilities of multiple government agencies and NGOs and working toward a unified and targeted goal. In particular Mr. Nuckols has led several projects which have utilized needs expressed by the military for training or proof of concept trials for weapons systems with interests of federal environmental agencies such as DOC/NOAA, DOI, USDA, DHS and EPA. His track record for success includes leveraging the skills and interests of senior career and political SES officials along with representatives from the Executive Office of the President to accomplish high profile, multi-agency projects in Florida, Washington State and Hawaii.

His skills in strategic communications and his experience as a spokesperson for federal and NGO organizations has resulted in his appearances on international, national and regional TV. Radio interviews of Mr. Nuckols have appeared several times on National Public Radio in the United States, Canadian Broadcast Company, and in Australia and Europe. Articles about Mr. Nuckols' work on oceans have appeared in print in numerous publications in several languages.

His expertise in multi-agency programs and policies has been called upon to brief members of Congress, officials in multiple Presidential Administrations, as well as elected and career officials in state governments and representatives of foreign countries.

Since 1998 Mr. Nuckols has served as the Principal of W.H. Nuckols Consulting, an environmental policy and strategic communications company located in Washington, D.C.
